

PRINTERS REPLACED FAST AND EASY

Advance Depot Exchange Service

Now, there's an easier, more efficient way to limit your downtime due to a broken printer: Advanced Depot Exchange. Printers are stocked at customer depots or individual stores. So when a customer deploys an advanced depot printer, they notify us which then triggers a shipment of a replacement printer. Simultaneously, they ship us the defective printer with the prepaid shipping label. The defective printer is then repaired and put into a pool held by TransAct. Printer replacement shipments are Monday - Friday and are usually ground.

- Agreement required
- Spare pools are maintained and managed by TransAct
