

EPIC[®] TT+

TRANSACT[®]

Designed for cash desks, players' clubs, and table games

Engineered with a faster processor for performance, reliability, and connectivity to power a thriving casino, nonstop. From the TITO printer brand you trust, TransAct's new Epic TT+™ packages everything you need—power supply, interfaces, and a print head that won't quit—into a smart design for any action-packed gaming floor.

BENEFITS

ENGAGE BEYOND THE FLOOR

ServerPort™ and Epicentral® bring real-time promotions to the cash desk, players' club and table games, not just the slot floor.

SCANS FIRST TIME

300 dpi printing produces barcodes validators read on the first pass, reducing voided tickets and disputes at the window.

KEEPS THE LINE MOVING

TicketBurst™ jam-free technology prints and cuts each gaming voucher before presentation, eliminating player interference and ensuring maximum uptime.

MORE TICKETS, FEWER RELOADS

Accommodates a 600-ticket stack, and prints down to the last ticket, so staff can focus on guests instead of servicing the printer.

KEY FEATURES

TICKETBURST™ BEZEL

Prints and cuts the complete voucher inside the bezel, presenting it only once finished. No partial ticket is ever exposed.

600-TICKET CAPACITY

Holds a standard 600-count stack (156mm) and feeds reliably down to the final ticket.

MAXIMUM RELIABILITY

Less than .03% Failures
(3 per 10,000 Printers)

INTERNAL POWER SUPPLY

Mounted inside the enclosure. No external adapter required; no visible clutter.

PROPRIETARY VERSATILITY

ServerPort™ links the printer directly to Epicentral®, so a single unit at the desk prints both TITO transactions and real-time promotional coupons.

EASILY UPGRADED

ServerPort™ mounts externally, so Epicentral can be added to printers already in service without replacing hardware.

RESOLUTION

300 DPI

PRINT WIDTH

2.44in/62mm

PRINT SPEED

5in/125mm per Second

WEIGHT

6.0lbs/2.7Kg

DIMENSIONS

5.5W x 14.3D x 7.3H (in)
140W x 363D x 185H (mm)

INTERFACE

USB-B 2.0 & RS-232
Serial
4-Pin Connector

DIP SWITCH 1 SETTING FOR USB-B 2.0

Windows Print Device or
Virtual Serial Port (VSP)

POWER SUPPLY

100-240 VAC, 50-60Hz,
1.5A,
C5 (Cloverleaf) Socket

OPERATING TEMPERATURE
