

TransAct Supplier Quality Manual

The purpose of the Supplier Quality Manual (SQM) is to outline TransAct requirements for suppliers and identify expectations to support ongoing business with TransAct.

Suppliers shall review and accept the business practices outlined in the TransAct Supplier Quality Manual. These practices are in place to ensure suppliers consistently conform to TransAct's standards. This sets the foundation for commitment to Quality and On-Time Delivery while TransAct develops, grows, and extends our supplier business relationships.

Mark Kane

Vice President, Global Quality
